

FOLLISTATIN 344

PEPTIDE RESEARCH COMPOUND

Dilution Guidelines

- Reconstitute using **0.6% acetic acid** or another **mildly acidified laboratory buffer** to support solubility
- Allow both the vial and diluent to reach **room temperature** prior to reconstitution
- Tilt the vial and allow diluent to run gently down the inner wall to minimize disruption of the lyophilized material
- Add diluent slowly to reduce foaming and promote uniform dissolution
- Swirl gently until dissolved – **do not shake**

Appearance After Mixing

- Typically forms a **clear to slightly opalescent, colorless solution**
- Mild surface bubbling may occur – allow the solution to settle before handling
- Full dissolution may require brief equilibration at room temperature with gentle swirling

Storage

- Store at **2–8°C (refrigerated)** after reconstitution
- Do not freeze once reconstituted
- Protect from agitation and repeated temperature fluctuations
- Use within **short research handling windows** to preserve molecular integrity

DISCLAIMER

This compound is provided **for laboratory research purposes only**. It is **not intended for human or veterinary use**, and no therapeutic or diagnostic claims are made.
