

FOXO4-DRI

PEPTIDE RESEARCH COMPOUND

Dilution Guidelines

- Use **1.0–2.0 mL** BAC water per **10 mg** vial (adjust proportionally for other vial sizes)
- Let vial and BAC water reach **room temperature** before mixing
- Add diluent gently down the inner wall; avoid spraying directly onto powder
- Swirl or roll gently until fully dissolved; avoid vigorous shaking

Appearance After Mixing

- Typically forms a **clear, colorless** solution
- Minor bubbles/foam may occur—allow to **settle fully** before drawing
- If micro particulates persist, continue gentle swirling until clear

Storage

- Refrigerate **2–8°C** immediately after reconstitution
- Avoid repeated freeze–thaw cycles; protect from light
- **Use within 10–20 days** after mixing for best stability

DISCLAIMER

This compound is provided for **laboratory research purposes only**. It is **not intended for human or veterinary use**, and no therapeutic or diagnostic claims are made.
